Passenger Boarding Bridge (PBB) Safety Shoe

August 1, 2019

Background: One of the safety features on all Bradley West Jet Bridges is a sensor commonly referred to as the “Safety Shoe.” This device is placed in between the door of an aircraft and the PBB floor. If the auto-leveler fails, the safety shoe is the last line of defense against aircraft door damage.

**PLEASE REPORT ANY DAMAGED EQUIPMENT IMMEDIATELY TO
VANDERLANDE CONTROL ROOM OR TBITEC.**

Vanderlande Control Room: 310-215-1218

TBITEC Duty Manager Hotline: 310-646-9378
